Shriram EPC bags orders worth Rs 83 cr

Chennai, June 24: Shriram EPC Limited (SEPC), a leading service provider of integrated design, engineering, procurement, construction and project management ser-

vices for renewable energy projects, process and metallurgical plants and municipal service sector projects throughout India and manufacturer of wind turbine generators, has been awarded two orders amounting to Rs. 83 crore from the Urban Improvement Trust (UIT), KOTA.

The orders are for the works relating to laying and commissioning of sewerage, manholes and road works across different locations in the city of

Kota and also include commissioning and maintenance of two pumping stations.

Commenting on the order win T. Shivaraman, Managing Director & CEO of Shriram EPC Limited, said "We are delighted with both the order wins as they highlight our competency in these areas.

Our Order Book in the Municipal Services space has become sizeable with these order wins as well as the Rs. 76 crore order

from the Bangalore Water Supply and Sewerage Board announced earlier.

There is clearly an increase in order momentum in FY11 as we have already received orders in excess of Rs. 300 crore in the first three months itself.

The increasing traction in the EPC space provides us with several opportunities for growth which will enable us to deliver sustained returns to our stakeholders."
